

CHART R1 – ACTIVATION DATES FOR LOW VOLUME VEHICLE CERTIFICATION

- ⊃ Where a vehicle is modified after the date shown against the applicable safety item and class, then it is a LVV, unless excluded by Section 4 of the relevant LVV Standard.
- ⊃ It only needs one item covered by a Rule or VSR to be modified after the date shown for that vehicle to be subject to LVV certification.
- ⊃ Where all safety related modifications carried out on a vehicle are before the item date for that class, the vehicle is not a low volume vehicle.

Note [1] Applicable to LE1 & 2 only. [2] Mirror does not have to comply with an alternative standard [3] Introduction deferred [4] 'na' means this VSR is not applied to that vehicle class. [5] Bold **dates** indicate the introduction of approved standards. [6] For LVV certification purposes the term 'Fitness for Purpose' refers primarily to original equipment items that are affected by modifications, but may also be applied to modified items that are safety related but not covered specifically by a VSR or Rule.
